

ROLL UP DISPLAY WALL

PRODUCT ADVANTAGES

- Durable.
- Lights available.
- Colourfast.
- Cost effective.
- Light & retractable.
- Perfect for indoor use.
- Brilliant colours and graphics.
- Comes with carry bags.

SPECIFICATIONS

The Roll Up Wall is a modular display system that features adjustable height poles that support a top tube containing a retractable graphic. The top of the graphic is fixed to a self adhesive strip on a leader in the same manner as normal Roll Up displays. A pocket needs to be formed on the base of the graphic to hold a rod that hooks onto clips at the base of each stand.

Simple to assemble and visually impressive the Roll Up Wall can be used as a single unit or as multiple units to create a row of graphics of the same or varying heights. All components come in good quality bags.

Heights are adjustable to 1000, 1500, 2000mm.

Standard width is 1000 & 1500mm.

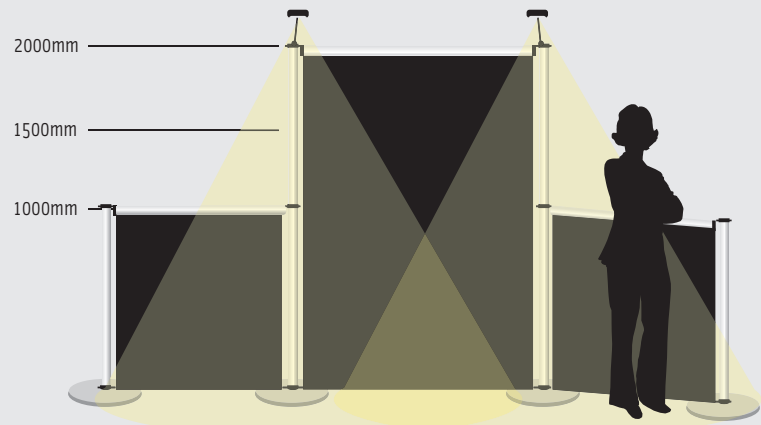

Weights for the single sided Roll Up Wall are:

4.5 kg for bases (pack of 2)

5.0 Kg for telescopic poles (pack of 2)

3.0 kg for top rail

12.5 Kg total
